

## **ABSTRACT**

To provide a toilet seat paper setting method and device for toilet seat wherein paper sheets can be easily supplied to and removed from the toilet seat. The invention is characterized by comprising a toilet cover equipped with a paper cassette with paper sheets, which are placed to cover the seat surface of the toilet seat and stored in the cassette so that they are stacked in many layers and can be taken out one by one, a number of air suction holes disposed in the toilet seat so as to open to the seat surface of the toilet seat, and an air suction means disposed so as to draw air through the suction holes. With the toilet cover fitted to the toilet seat, the suction means is actuated to cause a paper sheet in the paper cassette to be sucked onto the toilet seat.
